

Unlocking Massive EHR Value

With a Clinical Communication Platform

Value-enhancers for your EHR

Role-Based Scheduling

Automate role assignments by shift, and reduce medical error risks during patient transfers.

Did you know...

20%

of malpractice claims involve missed or delayed diagnoses due to deficits in handoffs between providers.¹

Security Policies

Fortify your facility's communications by setting and enforcing security policies.

(e.g. PIN lock, message lifespan, etc.)

Did you know...

17,000

patient records are breached per day on average.¹

Referral Management

Communicate with affiliate physicians for patient referrals and follow-ups.

Did you know...

\$150
Billion/yr

The cost to the U.S. healthcare system in missed referral appointments.¹

Clinical Alerts

Instantly receive details related to nurse calls, bedside telemetry, and labs to evaluate urgency.

Did you know...

85%-90%

of alerts are false or nuisance alarms, indicating conditions that don't require clinical intervention.²

VoIP /Video & Voice

Instantly initiate voice and video interaction with other users.

Did you know...

43 mins/day

average time saved by employees after implementing VoIP.³

See how Clinical Communication & Collaboration platforms, like TigerConnect, close the gaps in EHR functionality. Check out **Part One** of this infographic and then download our eBook.
