

11 Eleven Ways

Nurses Can Get an Hour Back in Their Day with TigerConnect

Patient Admission from the ER

End delays in patient care by quickly and efficiently reaching the appropriate physician via their smartphone and expedite the admission process.

Time saved: 20 min to 2 hrs

Request Help In a Patient's Room

Save steps during nurse-to-nurse communication for assistance, and reduce burnout by easily engaging help from colleagues.

Time saved: 10 min

Contacting Environmental Services (EVS) Staff

Expedite room cleaning for patient admission and transfer by texting EVS with location and specifics regarding isolation precautions.

Time saved: 10-20 min

Nurse Needs to Contact the Resident

Cut down on phone tag by messaging succinct, yet detailed information, allowing the physicians to make an informed decision in a timely manner.

Time saved: 2-5 min

Critical Incident Notification

Notify and quickly assemble your care team by text and include critical patient information. Escalate the priority of the message if necessary.

Time saved: 10-15 min

Specialist Consult Request

Save time and reduce delays in patient care by providing detailed patient information to the specialist.

Time saved: 10-20 min

Wound Care Consult

Securely send a picture and description of the patient's wound to a physician for a consult.

Time saved: 10-30 min

Patient Status Change

Cut down on time delays from patient assessment to nursing intervention by expediting communication noting the status changes.

Time saved: 10-30 min

Lab Results Status Request

Securely message lab results to the proper group caring for the patient.

Time saved: 5-20 min

Dietary Services Requests

Increase patient satisfaction through faster meal delivery and more accurate communication of dietary needs.

Time saved: 10-20 min

Coordination of Care – Post-Discharge, Care Manager Follow-Up

Decrease readmissions by directly and securely messaging the primary care physician with the patient's summary and care plan.

Time saved: 10 min
