

TigerConnect Physician Scheduling

Adding a Microsite to Your Home Screen - Android

Follow these steps to add your organization's microsite to the home screen of your Android device. This will allow you to check the daily on-call and month view calendars for your organization.

Note that due to the various hardware models and software builds of Android devices, your screen and visual interface may appear differently from the examples below. **For Android devices using the Android 12 update**, please see page 2 of this guide before proceeding.

- 1 Open your organization's microsite link in your device's web browser (*Chrome browser shown below*).
- 2 Tap the **Share** button at the **upper right corner** of the screen.
- 3 Tap **Add to Home Screen**.
- 4 Change the description and tap **Add**.
- 5 The bookmark you created will appear as an app icon on your home screen.

TigerConnect Physician Scheduling

Adding a Microsite to Your Home Screen - Android

For Android devices using the Android 12 update, you will need to disable the re-direct feature to the mobile app when opening up the microsite link. Follow the steps below to do so:

1 Go to your **device Settings**, scroll down to **Apps**, then scroll down and tap on the **TigerConnect Physician Scheduling App**. You will see options related to this application.
Tap on **Set as default**.

2a From here, **tap to toggle Open supported link to OFF**. Microsite links will no longer re-redirect the user to open up the TigerConnect Physician Scheduling app.

2b Alternatively, if you click on **Supported web addresses** it will open up this window where you can see which web addresses will re-route to the app. You can toggle these off instead which will prevent these web addresses from being re-directed to the app.
