

# Quick Reference Guide

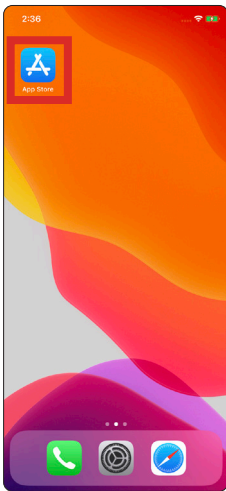

## Downloading TigerConnect - iOS

### How do I update the TigerConnect mobile app?

Please check your iOS device's App Store to make sure you have the most recent version of TigerConnect. Updating to a new version of TigerConnect, when one is available, will allow you access to new features and bug fixes to the application. iOS also provides the option to automatically update applications.

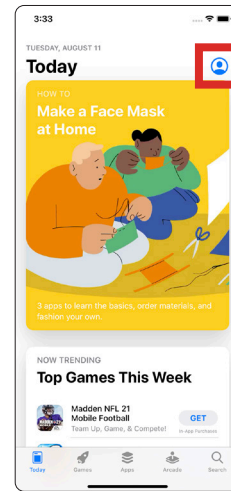

1. Click on App Store icon.

### Do I need to log out to update?

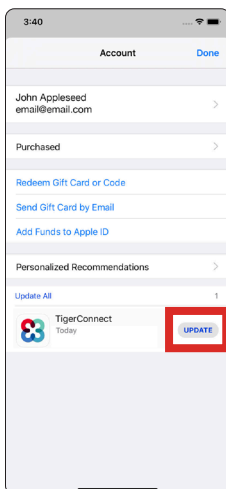

No, you do not need to log out to upgrade your version of TigerConnect. Your phone will either update automatically (if you have set your phone up for Automatic Downloads\*) - OR - from your iOS device's App Store's Updates section, you may select the **Update** option in your device's app store to complete the update. You will immediately be able to send and receive messages.

2. Click on your Apple ID profile in the upper right (iOS 13 and newer).

NOTE - iOS 12 and older: Access the Updates section by clicking the option in the lower banner on your device.

3. Click UPDATE.

4. Install Status Icon displays. Once complete, tap OPEN.
