Secure, Reliable Clinical Communication & Collaboration

tigerconnect®

TigerConnect® Clinical Collaboration Platform

- Secure, encrypted, HIPAA-compliant

- Cloud-based, interoperable, and reliable with 99.995% uptime

- Robust, easy-to-use features with a user-friendly interface

Streamline Workflows & Expedite Communication with TigerConnnect

TigerConnect Clinical Collaboration is healthcare's most comprehensive communication and workflow solution helping organizations of all sizes deliver faster, higher quality care.

TigerConnect facilitates HIPAA-compliant text, voice, and video communication with anybody inside or outside of your facility and offers easy-to-use, healthcare-centric features that remove barriers to adoption and simplify clinical workflows. TigerConnect's unified product suite and extensive integration capabilities ensure clinicians have instant access to the information they need to efficiently coordinate and deliver the highest quality care possible.

Connect Your Entire Healthcare Ecosystem

TigerConnect transforms the way your staff communicate and collaborate by connecting your entire healthcare ecosystem — nurses, physicians, support staff, patients, and external providers — all on a single platform.
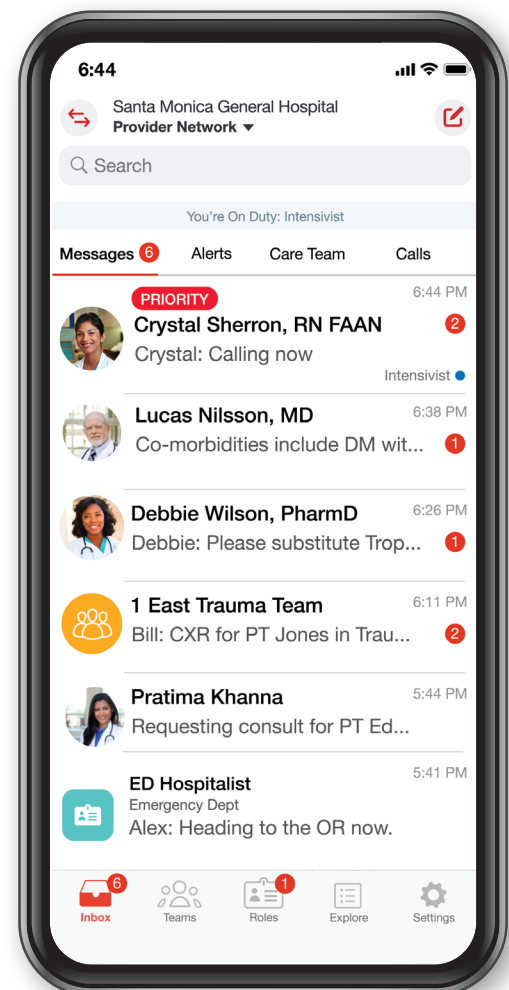

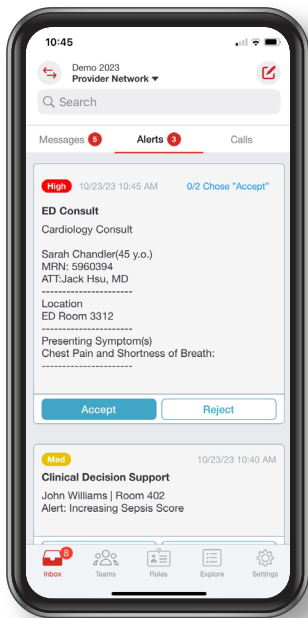

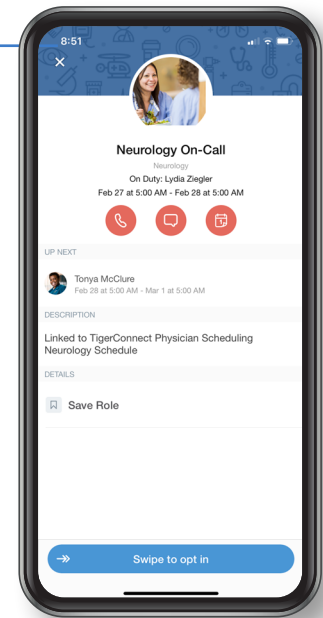

Better Collaboration with Roles & Teams

Eliminate time wasted figuring out who to contact and how to contact them. TigerConnect's Roles and Teams features allow you to quickly and easily communicate with the right person or team at all times, leading to fewer care delays and faster response times.

Instant Data & Alerts from Any System

Stay ahead of patient needs with instant access to data and intelligently routed, patient-centric alerts from your existing clinical systems. View patient and care team data from your EHR, and respond to actionable nurse call requests, critical lab values, and more — all within TigerConnect.

Reach the Right People, Right Away

Connect your entire organization and beyond on a single, easy-to-use platform built to streamline workflows and accelerate speed to care.

- Protect patient safety by ensuring urgent messages receive a timely response with Priority Messaging and Message Escalations
- Quickly find and contact the right on-call or on-duty staff member by searching for their assigned Role — no first or last name required
- Instantly mobilize pre-defined Teams for code blues, STEMIs, and other critical response scenarios to shorten response times and improve patient outcomes
- Connect with patients and family members with ease via secure text, voice, or video without any patient apps or portals

Connect Care Teams to Real-Time Data

Bring data from disparate systems into a single platform to help care teams better manage their workloads and coordinate care more efficiently.

- Access up-to-date on-call schedules for faster physician consults by integrating with TigerConnect Physician Scheduling or a 3rd party system
- View all care team members assigned to each patient so you can quickly identify and communicate with the right people
- Minimize communication errors by attaching patient identifiers from your EHR to conversations
- Route consult requests, critical lab values, and other actionable alerts to the right clinician in real time with TigerConnect Alarm Management & Event Notification

Clinical Workflows That Improve the Way You Work
