

Solutions Guide

TigerConnect

Healthcare's Collaboration Platform

Accelerate productivity, reduce costs, and improve patient outcomes, safely and securely.

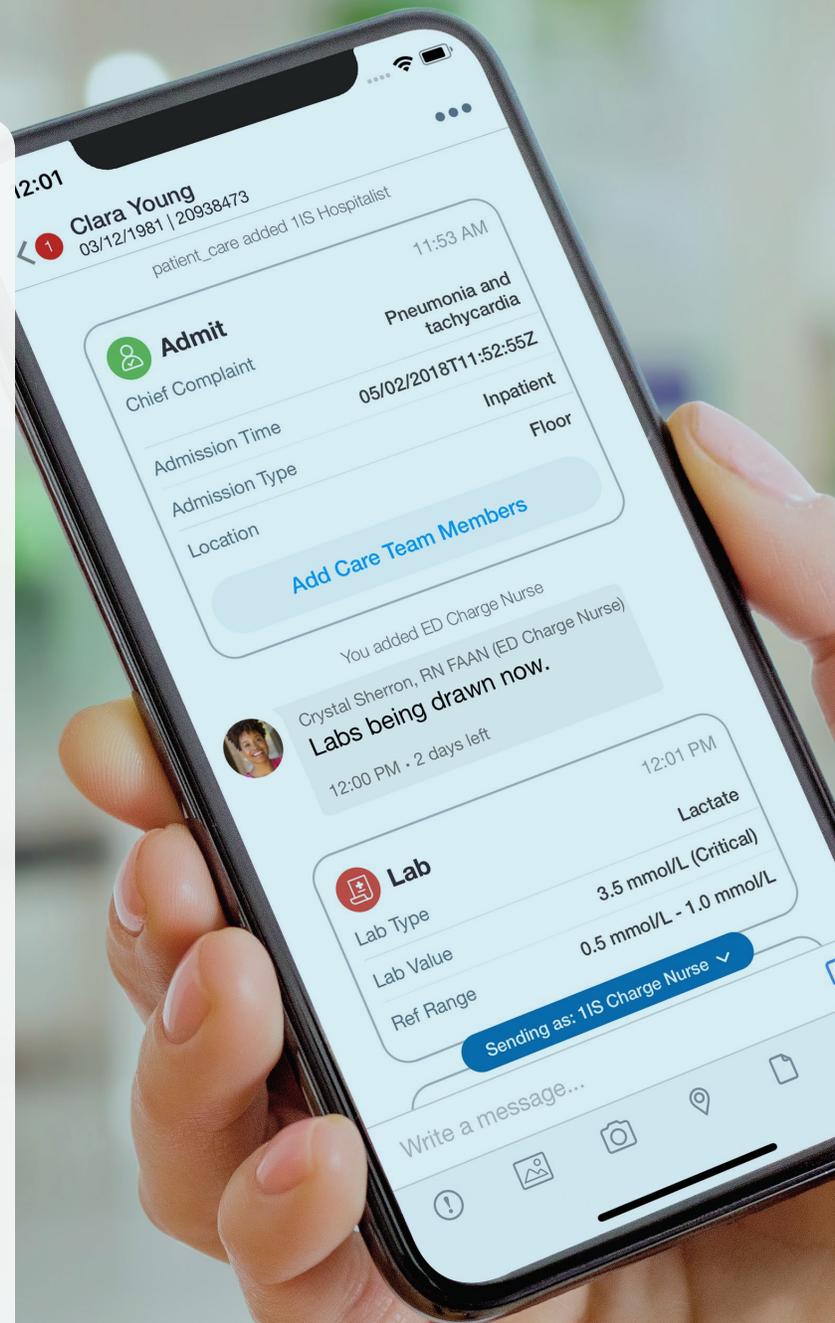

The collaboration platform built for healthcare

Healthcare technologies are converging in ways we couldn't have seen a decade ago. Seemingly unrelated technologies around communication, bedside alarms, lab results, video conferencing, on-call scheduling, and more have merged into a single cloud-based, completely-connected collaboration platform.

At the crossroads of this convergence is TigerConnect – built to solve healthcare's biggest workflow challenges with solutions that are easy to implement, embraced by staff and patients, and cost-effective with a high ROI.

This guide explores the capabilities that modern care organizations of any size can apply to improve care communication and coordination between teams and with patients.

So whether you're an innovative organization looking to hone your edge or simply looking to learn more, TigerConnect is here to help support you at every stage in your journey.

TigerConnect Collaboration Portfolio

TigerConnect Clinical Collaboration Platform

CAPABILITIES

Advanced

- Broad System Integrations
- On-Call Scheduling
- EHR (existing HL7 feed)
- Labs, Imaging
- VoIP/Voice & Video Integration
- Telephony (PBX/SIP) Integration

Extensive industry integrations

Pro

- Roles
- Scheduling Integration
- Teams
- Escalated Messaging
- VoIP/Voice & Video Integration
- Telephony (PBX/SIP) Integration

Standard

- Secure, HIPAA-compliant Texts
- Standard Messaging Features
- Group Conversations & Broadcasting

TigerConnect Collaboration Solutions

TigerConnect Alarm Management & Event Notification

- Nurse Call & Alarm Management
- Smart Bed Integration
- EHR Integration
- Rounding
- Workflow Analytics (Roadmap)

Integrates with: [Advanced](#)

TigerConnect Physician Scheduling

- On-Call Scheduling
- Resident Block Scheduling
- Shift Scheduling

Integrates with: [Advanced](#) | [Pro](#)

TigerConnect Patient Engagement

- App-free Video & Text
- Welcome Lobby
- Automated Reminders

Collaborate better with healthcare's most powerful product suite

Coordinate care across teams and facilities with healthcare's most advanced, highly integrated suite of collaboration products. Improve communication across the organization and optimize resources using a portfolio of powerful solutions for collaboration, alarm management, event notification, physician scheduling, and patient engagement.

Solve your most **critical workflows**

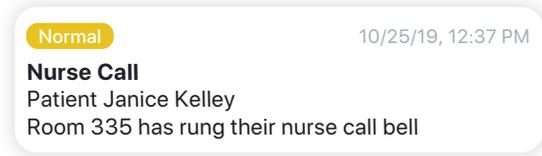

Clinical Collaboration Platform

Standardize communication and collaboration on a single, secure, integrated, cloud-native platform that streamlines workflows and makes teams more efficient.

- Improve team communication across departments and facilities
- Save time and steps with role-based communication
- Ease the IT burden with cloud technology and easy management

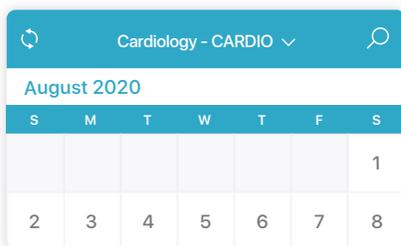

Alarm Management & Event Notification

Stay ahead of patient needs with instant, intelligently-routed, patient-centric alerts. Receive and respond to nurse call requests, physiologic alarms, and critical results from anywhere on the hospital floor.

- Reduce alarm fatigue and distractions with prioritized alerts and intelligent routing
- Enhance decision-making with real-time analytics
- Lessen admin complexity with workflows

Physician Scheduling

Trade spreadsheets for a true, purpose-built, on-call scheduling system. Build a year of schedules in under a minute. Distribute call assignments fairly, swap shifts directly, and automatically block appointments for time off.

- Reduce time spent on tedious schedule creation through automation
- Ensure fairness with a customizable rules engine
- Streamline schedule changes through intuitive shift swaps and time-off requests

Patient Engagement

Text patients directly and quickly set up video calls. Use one app for both clinical and patient communication. Simplify the patient experience with a virtual welcome lobby and automated appointments.

- Ensure care plan adherence through pre- and post-visit education and follow-ups
- Conduct virtual visits and reduce no shows through auto-appointment reminders
- Ease the emotional burden on families with status updates throughout admission

TigerConnect Clinical Collaboration Platform

Smarter, Faster Care Team Collaboration

Modernize the way your care teams connect and collaborate. This reliable, secure, and easy-to-use solution makes communicating easy and part of the workflow so patients receive better care, faster. Role-based messaging provides instant accessibility while built-in Wi-Fi calling and paging integrations cut down on unnecessary hardware costs.

HIPAA-compliant messaging

Secure, encrypted messaging protects patient information and meets HIPAA guidelines.

Unmatched reliability

Verifiable 99.99% uptime keeps communication active even if other systems go down.

Full administrative control

Management tools to oversee user permissions across multiple sites.

Includes:

Secure Text Messaging

Protect patient data with an encrypted, HIPAA-compliant HITRUST CSF-Certified solution.

Role-Based Messaging

Quickly look up and message the right on-duty staff by role assignment and to ensure message continuity for shift handoffs.

Escalated Messaging

Automatically escalate unanswered messages after a set period of time by role or individual.

Paging Integration

Route external pages directly to the TigerConnect message feed.

Teams

Quickly activate pre-defined teams (Sepsis, Code Blue, etc.) for faster event-based response times.

Also available:

Wi-Fi Voice & Video Calling

Connect with staff using Wi-Fi video or voice, and conduct remote consults quickly and safely.

PBX Integration

Expedite nurse workflows by forwarding calls from a PBX system to the TigerConnect app.

TigerConnect Alarm Management & Event Notification

Highly configurable rules-based workflows

Help nurse teams stay ahead of patient needs with instant, intelligently-routed, patient-centric alerts and alarms that tie directly to existing systems. Receive and respond to nurse call requests, physiologic alarms, and critical results from anywhere on the hospital floor. Accept, reject, or escalate requests while reducing alarm fatigue using configurable rules.

Intelligently routed notifications

Deliver faster care confidently with an FDA-Cleared Class II medical device for secondary alarm and alert notifications.

Intuitive workflow design

Create customized clinical workflows with a rules-based interface & drag-and-drop functionality.

Analytics-based optimization

Connect patient behavior and patient experience metrics for actionable insights related to staffing and resource allocation.

Available options:

Nurse Call Software

Enhance nurse productivity, enable bedside communication, and reduce false alarms by integrating with existing nurse call systems.

Smart Bed Integration

Get instant visibility into patient bed status to centralize bed management and reduce fall risks.

Advanced Analytics

Create a holistic view of care delivery using real-time data from clinical systems.

EHR Integration

Intelligently route data and alerts like critical lab results from the EHR directly into TigerConnect.

Alarm Management

Redirect alerts and alarms to the appropriate nurse or care professional by alert type and patient or room assignment.

TigerConnect Physician Scheduling

Automated scheduling for on-call and work assignments

Replace spreadsheets for a true, purpose-built, on-call scheduling system. Build a year's worth of schedules in less than a minute. Equally distribute call assignments with a fairness algorithm. Swap shifts from a mobile device without engaging the scheduler and automatically block out in the EHR to account for vacation or time off.

Simplified swaps and time-off requests

Allow providers to request and approve assignment swaps right from a smartphone or computer.

Reduced workload for managers

Free up hours of toil caused by manually building and updating the daily call roster.

Automated, easy-to-modify calendars

Carry over custom rules and role assignments month-to-month and build fair, repeatable, easy-to-manage schedules related to staffing and resource allocation.

Includes:

Automated Scheduling

Reduce burnout and improve provider satisfaction via automation that generates fair and evenly distributed schedules.

Custom Rule Builders

Leverage sets of custom rules and templates to accommodate any and all staff needs.

Time-Off Requests

Manage vacation and time-off requests directly from the mobile app.

Patient Reschedules

Integrate Physician Scheduling with your EHR to automatically block, freeze, and cancel patient appointments when time-off requests are approved.

Swaps and Changes

Make it easy for providers to easily request assignment swaps with colleagues.

TigerConnect Patient Engagement

A faster, more efficient way to reach patients

Text patients directly or set up voice and video calls quickly and easily. Switch seamlessly between clinical and patient communication, all within the same app. Patients simply open a text message to start the conversation. Manage patient intake with a virtual welcome lobby and automated appointment reminders, and import patient lists right from the EHR.

One app to connect with patients and staff

Communicate with hospital staff, patients, and their families in a single, easy-to-use app.

Text, voice, or video

Connect with colleagues, patients, families, and specialists in a way that best fits the situation and needs of the patient.

Easy for patients - No apps or passwords

Ensure higher response rates with browser-based accessibility through text or email.

Includes:

Pre- and Post-Care Outreach

Address patient concerns hours or days after a hospital stay to identify potentially serious issues.

Family Communication

Keep family members updated on patient's status and involved in follow-up care conversations.

Virtual Patient Engagement

Conduct virtual visits with patients from anywhere using video or voice options.

Automated Appointment Reminders

Send automated messages to remind patients of upcoming appointments including directions to your location.

Broadcast Messaging

Let patients know about office closures, flu shot reminders, or status changes.

EHR Integration

Pull in patient lists from the EHR for quick lookup and outreach.
