

Streamline Patient Movement with TigerConnect Transfer

TigerConnect® Transfer

Optimize Patient Flow Through Digital Transfer Management

Patient transfers and discharges can burden healthcare staff with excessive phone calls and paperwork, hindering optimal patient flows and throughput. TigerConnect Transfer streamlines manual coordination by combining bed sourcing, transport scheduling, and real-time communication into a single platform. Hospitals gain visibility into available resources while improving patient flow and reducing delays.

Coordinate Emergency and Non-Emergency Transports

Order ambulance and medical transport services directly through the platform, eliminating phone tag with transport partners.

Locate Available Beds Across Healthcare Facilities

Locate open beds quickly to improve resource use and speed patient replacement.

Track Transfer Status in Real-Time

Monitor discharge progress and transport status to improve care transitions and decision-making.

Automated Reporting and Analytics

Track key metrics automatically without manual data entry. Generate transport vendor performance reports for quality assurance and feedback.

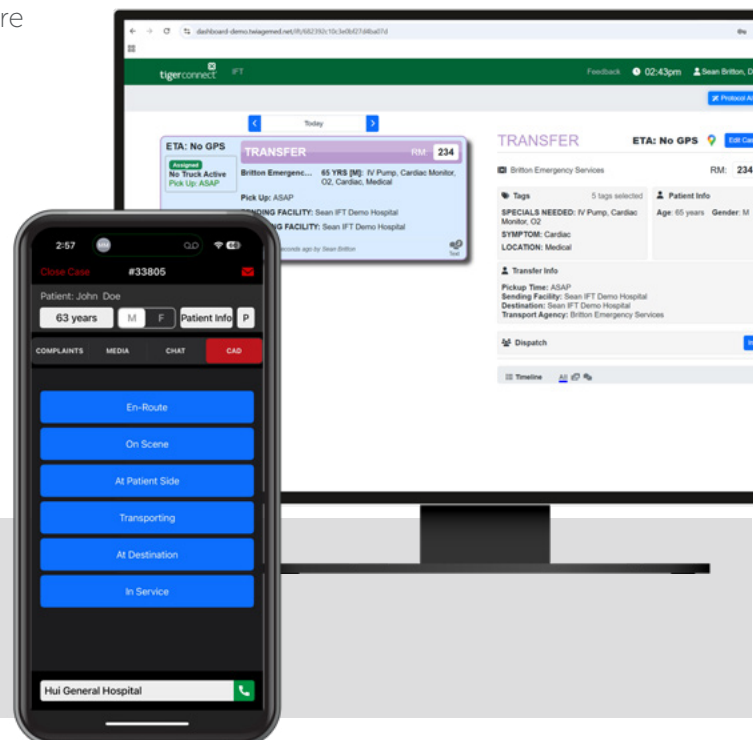

Simple, Cost-Effective Solution

Monitor and deploy resources from a single dashboard without expensive, complex systems.

Find Out More

See how **TigerConnect Transfer** can help you streamline operations and enhance patient care.

- Streamline transfers to improve patient throughput and flow
- Accelerate care for high-acuity patients
- Improve patient wait times and satisfaction
- Deliver real-time visibility to all stakeholders
- Enable efficient transfer center operations with optional dispatch capabilities
